

\$6.4 Million Savings: Executive Guide to Quality & Manufacturing for Life Sciences Enterprise

Real Results Achieved With MasterControl by Real Enterprise Customers

184,072	hours saved annually through improved labor efficiency.
85,614	hours reduced in training management alone.
40,776	hours eliminated from document searching and viewing.

\$6.4M

in total annual cost savings.

\$3M

saved in training management.

\$1.4M

reduced in document search/viewing costs.

 **Over 3.3 million training tasks** completed at a single enterprise.

 **123,142 document tasks** processed efficiently.

 **62,151 document completions** managed seamlessly.

The Challenges Enterprises Face

Drowning in Documentation

Your teams spend thousands of hours annually managing paperbased records, spreadsheets, and manual approvals—time that could be spent on innovation and manufacturing excellence.

Disconnected Systems

Critical data remains trapped in silos between QMS, MES, LIMS, and ERP systems, forcing operators to become human middleware and compromising data integrity.

Regulatory Pressure

As global regulations intensify, maintaining compliance across multiple facilities with inconsistent processes creates unnecessary risk and costly delays.

A Better Way Forward With MasterControl

One Platform, End-to-End Quality and Compliance

Connect manufacturing excellence with quality management on a single platform that's designed for compliance, eliminating silos and providing complete visibility.

“ Purpose-built on a single platform integration, with QMS-MES bridging capabilities.”
